Microsoft AppSource

Best marketing
& PR solution

In a nutshell

CodeTwo Email Signatures 365 lets you manage email signatures, legal disclaimers, automatic replies and marketing campaigns for all users in your Microsoft 365 organization. It's a cloud service that works with all email apps and devices, including Windows, Mac, mobiles and tablets.

-  Automatically add signatures to emails sent from any email client and device
-  Insert signatures directly in Outlook as you type or add them later in the cloud
-  Preview cloud signatures in Outlook, Outlook for Mac and OWA or in Sent Items
-  Insert signatures under the latest reply/forward
-  Delegate signature management rights to specific users and groups
-  Create professional signatures using an intuitive web editor
-  Easily add images, logos, banners and Microsoft 365 user photos
-  Auto-fill signatures with Microsoft 365 (Azure Active Directory) data
-  Built-in one-click surveys & customer satisfaction analytics; email marketing and campaign tracking
-  Seamless Microsoft 365 integration, express deployment
-  Secure email processing within Microsoft 365
-  The only Microsoft 365 Certified signature app
-  24/7 back-end support and monitoring
-  Developed and supplied in compliance with ISO/IEC 27001 & 27018

What experts say

"Working closely with CodeTwo enabled us to learn from one of the leading organizations in the online signature business and ultimately helped us design and release key features in our platform."

- **Juan Balmori Labra** (PPM at Microsoft)

"The ability to securely assign individual users management of signatures without enabling any Exchange administrative rights, and using Azure AD as SSO, makes CodeTwo secure."

- **William Bressette** (Microsoft MVP)

"CodeTwo has exceeded my expectations in every way. I recommend CodeTwo Email Signatures for Office 365 for anyone who needs to gain better control over their user's email signatures."

- **Brien Posey** (Microsoft MVP)

"I'm confident that administrators would be saved a great deal of configuration headaches if they used CodeTwo solutions."

- **J. Peter Bruzzese** (Microsoft MVP)

"CodeTwo are experts in their field and their Exchange and Outlook products are excellent - from the user's interface, right down to the engine."

- **Diane Poremsky** (Microsoft MVP)

"CodeTwo programmers are perfectionists who are passionate about what they do. That's all it takes to create products that every company wants."

- **Emil Wasilewski** (Microsoft MVP)

Centrally managed email signatures

Subject: Microsoft 365 Signatures

Hello Natalie,

We've been searching for a service that will help us create and manage email signatures and disclaimers for all users in our organization. Could you recommend a product that integrates automatically with our Microsoft 365? A web app would be perfect.

Best Regards,
Amy Bolden

Easy to use signature template editor

Email marketing & analytics

Built-in one-click CSAT surveys & customer feedback insights

All email apps & devices supported

Express deployment

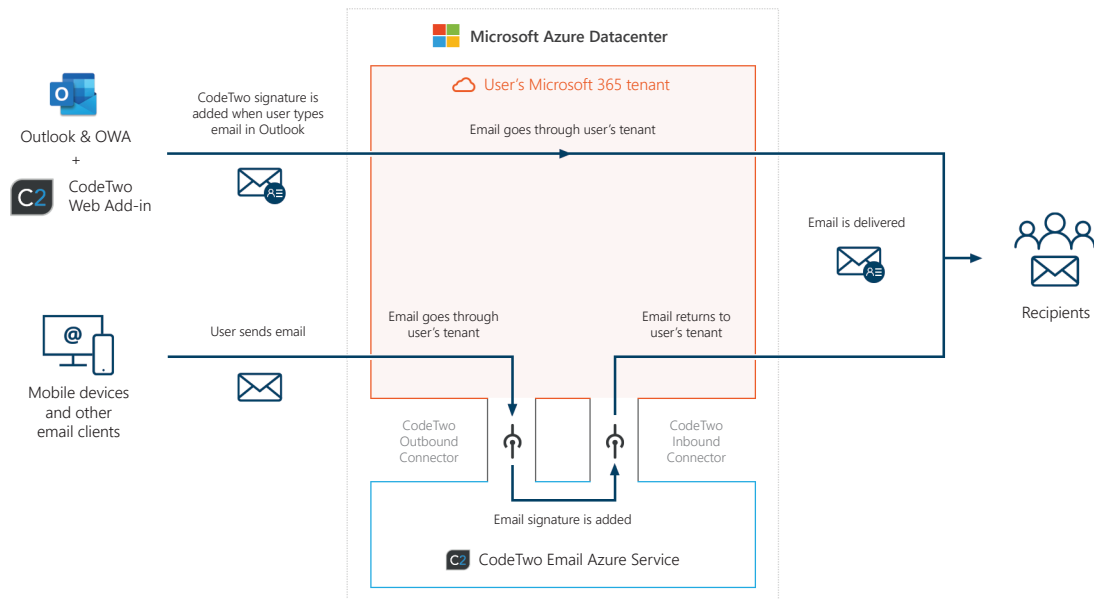

Highly secure

How it works

The software can work in three signature modes. In **cloud (server-side) mode**, all email clients and devices are supported - our Azure cloud service automatically adds a signature after an email is sent.

In **Outlook (client-side) mode**, an email signature is added directly in Outlook when a user types an email message.

In **combo mode**, when a user sends an email in Outlook, a signature is added directly to their message as they type. If this person uses another email client or a mobile device, a signature is added after an email is sent.

Reliability and security

Rest assured your emails are safe as they never leave Microsoft datacenters. Our product meets the highest security and reliability standards of business communication.

Microsoft 365 Certified

ISO/IEC 27001 & 27018

GDPR, CCPA, HIPAA & PCI compliant

Highest security score by SecurityScorecard
